

GMG

Amazing in any challenge

GMG

Reduce cost to clean and get the greatest return on your investment in short term

SPEED

up to **9** km/h
at work

PRODUCTIVITY

+30%

POWER

- Increase productivity, by cleaning with greater power and 30% faster than a conventional model of the same category
- Increase productivity, by cleaning ramps with slopes up to 20%
- Increase productivity, with the possibility to install batteries of different technologies, from lead acid batteries to advanced lithium-ion ones, which provide up to 10 hours of run time on a single charge
- Reduce the time required for U-turns within logistics centres aisles, by changing direction in one smooth manoeuvre
- Increase operator productivity, with enhanced control over tasks provided by the touchscreen display and the rear view camera
- Increase operator productivity, providing up to 9 pre-set cleaning programs according to different applications
- Save on operating costs, with the low maintenance required by brushless motors

GRADEABILITY

slopes up to **20%**
working

RUN TIME

up to **10** hours

SIMPLICITY

- Reduce operator training, with on-board video tutorials which show how to perform common operation and maintenance activities
- Increase uptime, with easy and intuitive access to key features through the iD – Intelligent Drive system
- Enhance control over cleaning results, with pre-set work programs and supervisor controls that ensure proper machine setting and use by the operator
- Reduce service time and cost, with fully accessible design that enables easy and quick servicing

SUSTAINABILITY

- Reduce the use of resources, saving water, chemical and energy thanks to Fimap sustainable technologies
- Reduce the environmental impact, with constant control of the CO₂ produced
- Reduce water use up to 66% with FLR – Fimap Long Range technology, that allows you to clean more sq.m with the same amount of resources

FSS
up to **50%**
reduces water and chemical use

FLR
up to **66%**
reduces water and chemical use

DURABILITY

- Protect the machine and the facility in which it works, with steel wrap-around bumper and roller bumpers at the 4 corners

SAFETY

- Increase operator and facility safety, thanks to the array of active and passive safety technologies provided as standard

CONNECTIVITY

- Increase productivity by tracking performance with Fimap My.Machine app

CUSTOMIZATION

- Increase productivity by customizing GMG to your specific needs

A scrubbing machine designed to exceed your expectations in the most demanding industries

LOGISTICS

PARKING LOTS

TRANSPORTATION

INDUSTRY

LARGE-SCALE
RETAIL

Accurate details highlight the robustness of its design

It stands out for the strength of its design that enhances the sense of protection

PROTECTION

- **FOR ENVIRONMENTS**
It blends in perfectly, has no protruding parts
- **FOR THE USER**
It has a comfortable and safe driving position that enhances visibility and control
- **FOR THE MACHINE ITSELF**
Long-lasting, rotationally moulded plastic tanks and steel wrap-around bumper protect mechanical components, while rear sensors prevent potential collisions by warning when approaching an obstacle

● BRUSHLESS MOTORS

Motors without brushes bring several advantages:

- **MORE POWER**,
which is entirely used avoiding the dispersion that is normally caused by the friction of the brushes
- **GREATER DURABILITY OVER TIME**,
as they do not generate heat, there is no need for ventilation which can cause damaging seepages
- **COMPACT DESIGN**,
they leave more space to the volume of the tanks, thus increasing the working autonomy
- **GREATER CONTROL**,
which being electronic, and not electromechanical, automatically adjusts to the required performance, improving efficiency
- **NO MAINTENANCE**
and extremely longer life cycle

ENDURANCE OVER TIME

The roller bumpers at the 4 corners deflect shocks protecting the machine and extending its life

Components close to the floor and therefore in contact with water are made of stainless steel and treated aluminium, so they are resistant to corrosion

A comfortable space enables the operator to better focus on the cleaning task

Every single detail of the driving position is designed to provide the perfect working conditions: a comfortable seat, easy access to controls, full control of activities, smooth manoeuvres, total visibility of the surrounding space

The Eco Mode device reduces the noise level to clean without disturbing the other people around

A convenient step helps to sit
in the driver's seat

Side paddles integrated into the
steering wheel help the operator
keep his attention and eyes on the
driving direction

The digital touch screen
display creates a modern,
high-tech environment where
valuable information is shown
in high resolution

The side control panel provides easy
access to functions, allowing the
operator to work on settings without
getting distracted

Integrated USB ports for charging mobile
devices

Comfort driver's seat

The seat, with armrests and headrest,
is sprung and adjustable, to suit the
operator's needs, thus improving
driving comfort

GMG

Learning how to take care of GMG is easy,
because it is the machine itself that guides you

OPERATOR
TRAINING
VIDEO
TUTORIALS

They provide essential instructions to perform routine activities and to support the operator when a quick reminder is needed on proper operation and maintenance procedures

USE AND MAINTENANCE MANUAL
AND SPARE PARTS CATALOGUE

It is possible to read directly from the display the Spare Parts Catalogue and the Use and Maintenance Manual, available in 24 languages. Any doubts concerning the machine can be solved immediately, thanks to the easy-to-read touchscreen display.

SERVICE LIGHTS

The exclusive lights pack offers increased visibility of the parts which could require operator inspection, illuminating the relative zones with LED lights

FFF-FIMAP FAST FILL

It enables the solution tank to be filled up quickly without the presence of the operator

SPRAY GUN

The spray gun enables the cleaning of the recovery tank anywhere, even when there is no available tap nearby, reducing maintenance downtime.

REAR FOOTBOARD

A convenient pull-down footboard at the rear of the machine provides easy access to the tanks and a better view for maintenance activities

MAINTENANCE TOUCH POINT

YELLOW COLOUR-CODED PARTS

Parts which must be cleaned regularly at the end of every shift are colour coded in yellow for easy identification, saving time and making sure that your scrubbing machine is kept in perfect condition at all times

LARGE DIAMETER HOSES

The large diameter of the drain hoses allows the tanks to be emptied quickly, reducing downtime. The hoses feature a flow adjustment system that enables to choose up to 5 opening sizes in order to adapt the diameter to the flow when emptying the tanks

DUAL 3-STAGE VACUUM MOTOR

Effective vacuum system which leaves the floor dry with no risk of slipping

The layout of the squeegees helps to collect water and direct it towards the suction point, thus ensuring better drying.

The floor is perfectly dried even in bends, thanks to the lateral movement of the rear squeegee, which always follows the course of the machine.

FLR-FIMAP LONG RANGE

PRODUCTIVITY IS INCREASED BY UP TO

SIDE BRUSH WITH VACUUM SYSTEM

The side brush makes it easy to clean along walls and allows to reach under shelves. It is equipped with vacuum system, a unique innovation not available in any other model in the market, which increases drying performance even on bends

IT WIDENS THE WORKING WIDTH,
THUS INCREASING PRODUCTIVITY BY UP TO

+20%

GREATER CLEANING POWER TO TACKLE THE MOST STUBBORN DIRT

Adjustable brush pressure up to **250 kg**

Brush rpm up to **315**

VACUUM WAND

Enables cleaning areas that are difficult to reach with the machine and completing the operation every time

GMG

A power never seen before
in a scrubber dryer

RAMP UP

REAR-WHEEL TRACTION WITH 2 INDEPENDENT MOTOR WHEELS

The rear-wheel traction with 2 electronically controlled independent wheels provides GMG with the necessary power to easily overcome ramps of up to 20% working.

In a multistorey car park, GMG is therefore able to move easily from one level to another, guaranteeing high grip when climbing, reliability and maximum control when manoeuvring.

it can clean ramps with slopes up to **20%**

it can overcome trailer ramps with slopes up to **30%***

* empty in transfer using a hoist

MINIMUM AISLE TURN

2500 mm

The combination of rear-wheel traction and independent motor wheels allows a small turning radius, which remains within the machine diagonal of 2500 mm. As a result, the space required for manoeuvring is also minimal.

The friction that is usually generated in reversing causes a significant consumption of energy, which negatively affects the working range.

The action of the independent rear motor wheels together with the double front wheel of GMG considerably reduces the friction produced when steering. This avoids unnecessary energy dispersion, extends battery run time and increases productivity.

Power steering improves comfort

The power steering makes the steering wheel lighter, increases manoeuvrability and reduces the operator fatigue while driving.

REAR VIEW CAMERA

Lets the operator monitor cleaning results in real time from the display, without taking his or her eyes off the direction of travel

FUNCTIONS TO INCREASE POWER

The Power Mode and Heavy Mode functions allow you to get the maximum cleaning power instantly, by activating just one control. Vacuuming power, brush pressure and detergent solution flow rate are raised to the highest level.

POWER MODE

A simple touch of the side paddle raises the cleaning functions to the maximum for 120 seconds. This function is effective when the operator finds a small area with adherent dirt during the cleaning operation. In this case, it is useful to temporarily leave the cleaning configuration in use in order to benefit from the maximum cleaning power to remove localised dirt.

 for **120** seconds
Maximum cleaning power

HEAVY MODE

Maximum activation of cleaning functions has no time limits. It is a working mode, suitable for very dirty environments. The operator simply presses the Heavy Mode button to start working at maximum performance for as long as it is needed.

Maximum cleaning power with no time limits!

Get access to more information to improve performance, enter the digital world of GMG

ON-BOARD COMPUTER

With the touchscreen display you have access to information that is essential to make more efficient choices and enhance the professionalism of interventions, thus increasing productivity and reducing costs.

Display at any time:

- information about the batteries, their condition and the recharges performed, both complete and opportune
- report of usage time, sq.m. cleaned and liters of water used

- telemetry to track the energy consumption of the functions

- remaining autonomy of batteries and tank, and projection of savings that can be achieved in Eco Mode

iD-intelligent Drive

The operator is the centre of a high-tech universe, where everything is easy, intuitive and dynamic

All functions and activities are managed from a single interface, where a mere touch of the finger offers access to an extraordinary choice of customizable features to satisfy all types of requirements with extreme simplicity.

The high definition colour display offers the same intuitive experience as a smartphone

Touchscreen Display

LOG-IN WITH PASSWORD

Protects your investment from unauthorized or improper use

REAR VIEW CAMERA

Increases safety during manoeuvres and helps control cleaning performance

OPERATOR TRAINING VIDEO TUTORIALS

Reduce training costs, providing quick instructions on how to perform ordinary maintenance operations

9 working programs to achieve the best results with the maximum efficiency

Set your goals: with zone and working programs, you reduce the risk of error, make cleaning operations effective on the first pass and achieve desired results without any uncertainty

4 ZONE PROGRAMS

Set up to 4 zones that are frequent on your cleaning sites to help the operator carry out the task properly.

Save the cleaning settings you consider suitable for each zone; once the zone has been selected, GMG will start working with the configuration you set.

Working programs guide the operator through an intuitive selection of the most suitable cleaning configuration

5. ECO MODE

For light maintenance cleaning, where you can use less resources and work with a low noise level

6. COMFORT MODE

For ordinary, not heavy-duty cleaning, suitable for daily tasks

7. DYNAMIC MODE

For routine cleaning where greater productivity is required, it allows tasks to be done quickly

8. HEAVY MODE

For heavy-duty operations, to clean very dirty floors that require high cleaning power

9. POWER MODE

To get 120 seconds of maximum power and easily remove localized dirt

Some working programs can be selected from either the touchscreen display or the membrane keyboard below

GMG

Connect to your fleet, increase productivity with the My.Machine app

FIMAP FLEET MANAGEMENT

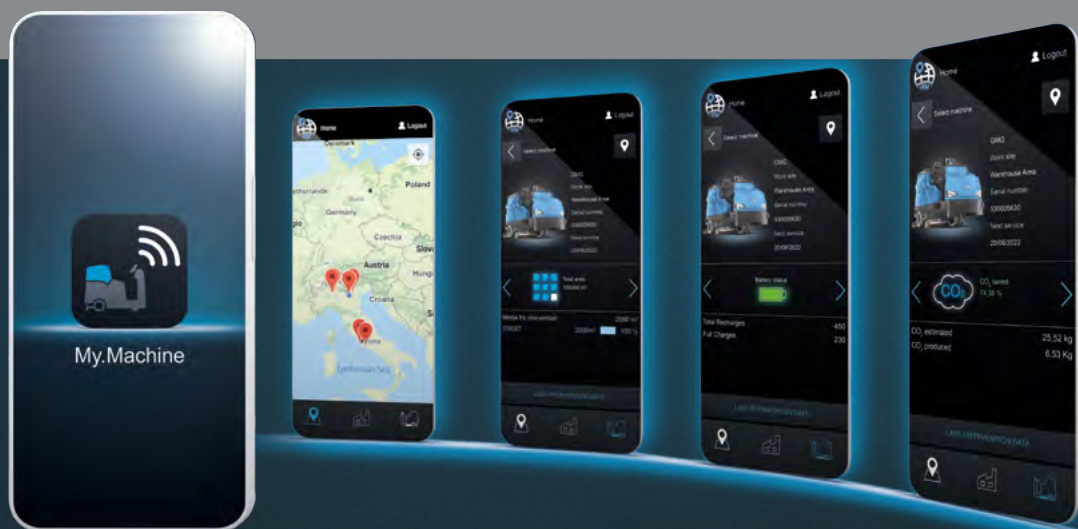

Track the performance of your fleet easily, through your smartphone, with the My.Machine app. You can see where your machines are, if the cleaning task is being carried out as planned or if any unexpected event has

occurred. Enter the profile of each scrubber dryer and check the list of servicing performed, the charger logs and anomalies occurred, in order to always be in full control of the situation and keep productivity high.

Manage your fleet remotely with the FFM – Fimap Fleet Management system,
use the My.Machine app
to access data at any time and don't miss a single detail of the status of your machines

Watch the video

GEOLOCATION

It shows on a map the machine.

USE INFORMATION

It's possible to know in what working mode the machine is operating and for how long. Moreover, it provides information about the duration of each intervention and the sq.m cleaned.

HEALTH STATUS

Anytime is possible to monitor the health condition of both machines and batteries to have a clear view of the fleet availability and optimize its coordination.

ENVIRONMENTAL IMPACT

It is possible to know the amount of CO₂ produced by the machine since the beginning of its life cycle.

ALARMS

The anomalies occurred are summarized in a list which includes a description of the type of issue, and the date and time of the event. It helps you to have an overview of the improper uses that need to be corrected.

BATTERY RECHARGE

It sums up all the complete and opportune recharges performed, the residual charge and the charge settings. This is an essential set of information to extend the battery lifespan and reduce the related costs.

SERVICES

An overview of the list of the maintenance services performed allows to identify discrepancies with the health condition of the machine in case an anomaly is detected, and to monitor the inspections of the whole fleet.

Greater control during interventions raises safety standards

REAR VIEW
CAMERA

Increases the safety of
reverse manoeuvres

ANTI-COLLISION
SYSTEM

The anti-collision system
detects obstacles
when reversing

ACTIVE TECHNOLOGIES to prevent accidents

In large spaces where there can be obstacles such as machineries or shelves, GMG always ensures full control of the surrounding space, so that the necessary manoeuvres can be carried out in the utmost safety.

Greater control during interventions raises safety standards

ACTIVE TECHNOLOGIES to prevent accidents

TOUCH SCREEN
DISPLAY

Enhances visibility in dim light

DESCENT
CONTROL

Maintains a constant speed when driving downhill, and prevents sudden increases in speed caused by gravity

STEERING
WHEEL
CONTROLS

The steering wheel controls offer the operator even greater control when cleaning, and also improve safety by eliminating distractions and letting the operator keep his or her eyes on the zone ahead of the machine

STOP&GO

The traction control system, which brakes and holds the machine when the accelerator pedal is released, provides assistance for both uphill and downhill gradients

CRUISE
CONTROL

Control device letting the operator set the required speed

ELECTROBRAKE

Is automatically operated when the machine stops. It works as a safety parking brake

HYDRAULIC
DRUM BRAKES

Self-adjusting, guaranteeing the best braking performance

ESC - ELECTRONIC
STABILITY CONTROL

Automatically reduces speed when steering without the operator using the brake

SAFETY BELTS

Protect the operator holding him/her in case of impact

OVERHEAD GUARD

To protect operators working in warehouses and logistics centres

BLUE SAFETY SPOTLIGHT

Warns about the presence of GMG when visibility is obstructed by shelves or other equipment, avoiding accidents

LED HEADLIGHTS

Front and rear LED headlights maximize work safety in all conditions

OPERATOR TRAINING VIDEO TUTORIALS

Any questions? GMG has all the answers: the video tutorials help the operator in every phase of the job

Position lights / Brake lights

Reverse lights

Driving lights

Position lights

PASSIVE SYSTEMS to help the operator in case of emergency

SOS
DEVICE

Reduces time to service in case of emergency. The red button sends an sms alert to receive a prompt help, reducing downtimes

EMERGENCY
STOP

By pressing a single button the machine stops immediately

Choose how to reduce the environmental impact of cleaning operations with Fimap sustainable technologies

GMG always shows you the advantages of a more eco-friendly option

During the cleaning intervention, a projection of how many resources could be saved by activating Eco Mode is shown on the display. In this way the operator can evaluate, if the dirty conditions allow it, to switch to a cleaning configuration that reduces consumption.

The Eco Mode device helps you to not use more resources than necessary. When just a maintenance cleaning is required and dirt is light, you can clean using reduced amounts of water, chemical and energy. By avoiding waste, you can clean more sq.m with less resources

START&STOP

When the machine is idle, the brush motor, the vacuum motor, the traction and the water flow will turn off automatically, reducing costs and emissions.

All the functions are reactivated automatically as soon as the operator touches the accelerator again

WATER

FSS-FIMAP SOLUTION SAVER

The amount of water and chemical are dosed separately

up to **50%**
It reduces water and chemical use by

FLR-FIMAP LONG RANGE

System that recycles the cleaning solution, increasing the working autonomy

up to **66%***
It reduces water and chemical use by

FWF-FIMAP WATER FLOW

Ensures uniform cleaning results across the entire working width on the first pass, optimising detergent solution consumption

ENERGY

FES-FIMAP ENERGY SAVER LED TECHNOLOGY

Up to 80% lower energy consumption than conventional headlights.

The LED headlights consume much less energy than conventional headlights, offer a longer lifespan and illuminate with a brilliant white light similar to natural daylight

up to **35%**
It reduces energy consumption by

* Per cleaning operation. Saving calculated on a triple recycling cycle

ACCESSORIES

CENTRAL SCRUBBING BRUSHES

SIDE BRUSHES

CENTRAL SWEEPING BRUSHES

A selection of disc or cylindrical brushes is offered for dealing with any type of dirt on any floor

Abrasive brushes:

Suitable for heavy-duty cleaning of industrial floors

The application of a pad holder allows the use of various types of pads according to the treatment to be performed

REAR SQUEEGEE RUBBER BLADES

33 SHORE (PARA): For maintenance cleaning of smooth floors

40 SHORE (PARA): For stubborn dirt on floors with joints

POLYURETHANE: For heavy-duty cleaning and collecting oil on industrial floors

LINATEX™: Suitable for all surfaces from smooth to uneven, they provide excellent performance because they are more resistant to wear, temperature changes and use of aggressive chemicals

SERVICES

CONSULTING AND PLANNING

We put our experience at your service, to help you realize the cleaning project perfect you. We suggest you the best solutions to make costs decrease and service quality increase.

SETUP

We can help you set up your machines in order to make them meet specifically the requirements of the sites of your project, allowing you to always have control over costs and results.

AUTHORIZED WORKSHOP NETWORK

Fimap Authorized Workshop network spans the globe, so you can enjoy the peace of mind of finding a professional support wherever your business is.

CONFIGURATION

Your business is unique, only a customized fleet can lead you to better results. We will help you find the configurations that best fit the specific requirements of your cleaning sites, in order to optimize processes and lower costs.

TRAINING COURSES

Fimap Academy offers courses for all levels, from the correct use of machines and technologies, up to the management of sites and tenders, helping you to make your service really competitive.

MAINTENANCE AND REPAIR

For your business to run smoothly it is essential that your machines are kept always operational. Our technicians take care of monitoring the machines health status and know how to intervene quickly and effectively when needed.

FINANCIAL SOLUTIONS

You can choose to use the fleet in different ways. We can advise you on the best financial solution for your business, so that you can get the quality of the Fimap world at the most convenient conditions for you.

DIGITAL FLEET MANAGEMENT SYSTEM

With Fimap Fleet Management everything is under your control. You can have a complete overview of the service provided and find out the improvements that can be made, basing your considerations on real data, always available via the MyMachine app or FFM website.

GENUINE SPARE PARTS

Get the most out of your machines, choose the reliability of Fimap original spare parts. They are designed together with the machines, so they perfectly fit them thus guaranteeing the highest quality of performance.

CERTIFICATIONS
